

Diversified Growth Fund

As at 30 September 2022

Overview

The Diversified Growth Fund (DGF) is a growth focussed fund where the member's assets are invested in a broad range of investments seeking to grow faster than inflation whilst at the same time managing the exposure to risk. It forms part of a member's Journey Path.

Over the quarter, the DGF delivered a return of -9.4% compared to the return objective of 2.6%. Over the 12 months a return of -19.2% was achieved compared to the return objective of 14.5%. The return over a 5-year period was 3.3% compared to the return objective of 33.2%.

In keeping with the Trustee's Responsible Investment (RI) objectives, sustainability remained core to the Fund with an RI allocation of 70%.

Journey Path: The retirement Journey Path is in three phases, from growth, to pre-retirement, to retirement. During the pre-retirement phase the majority of member pension savings are gradually moved from the DGF to the Retirement Countdown Fund (RCF), over a 15-year period. The allocation then remains constant in the retirement phase.

Full details of Journey Path and Fund Objectives are set out in the Statement of Investment Principles, here.

Description

The DGF allocates investments between five groups, consisting of different asset classes, each of which has different risk and return characteristics. The balance across the asset classes is at the Investment Manager's discretion, subject to agreed guidelines.

The Investment Manager bases its decisions on its long-term risk and return assessment of different asset classes, anticipated levels of diversification, impact of changing economic conditions and the integration of responsible investment considerations.

The integration of responsible investment considerations seeks to manage investment risk with the aim of enhancing long-term portfolio returns, which is in the best interests of the members and beneficiaries of the Fund.

Key facts

Fund Size: £2,579 million

Fund Launch Date: 18 December 2012

Base Currency: GBP

Domicile: United Kingdom

Return Objective: CPI +4% p.a. (net of asset-based charge)

Annual Management Charge: 0.3%

Unit Price: 153.4959p

Valuation and Dealing Frequency: Weekly

Pricing Basis: Single price

Changes over the quarter

The third quarter of 2022 was a volatile period for global markets. Although we're investing for the long term, we are mindful of the concern this can cause our savers. We continued to watch and manage the Fund closely to ensure it delivers on its objectives.

Sustainable investing remained a priority for the Fund. Our RI allocation increased to 70% from 52% over the past 6 months.

Investments within the Fund performed well in July, but bonds and equities saw material falls in value over the rest of the quarter. Many factors determine the value of investments. Persistent high inflation has been somewhat to blame for these market falls. Global central banks, including the Bank of England are focused on controlling inflation, which they look to achieve by raising interest

rates. Investors are mindful of this when assessing whether, and by how far, interest rates could continue to rise, and its impact on the global economy.

In the medium term, investors expect inflation to fall as higher interest rates are expected to slow economic growth. The overall impact was for all investments in the portfolio to fall in value during the third quarter.

In late September, the UK government announced a mini-budget, which caused a knee-jerk reaction in UK bond markets. This prompted material falls in assets that are often deemed less risky. It also caused the UK Pound to reach an all-time low against the US Dollar.

Objectives

Return objective

To deliver a return in excess of inflation, as measured using the Consumer Price Index (CPI) of 4% a year (CPI + 4% a year) or more over the long-term, net of the asset-based charge.

Risk objective

The expected risk, measured in terms of annual volatility, is 12.5% a year. The expected range is from 10% to 15%.

Responsible Investment objective

To achieve:

- Net Zero carbon emissions by 2050, consistent with the Paris Climate Agreement, and
- at least half of the portfolio's net asset value in investments which support the Trustee's RI beliefs.

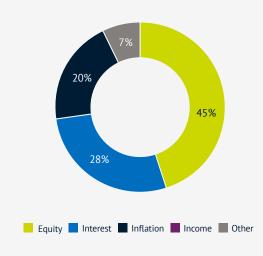

Fund returns

	Returns					Single-year member returns				
	3 months	12 months	3 years	5 years	Since Inception*	2021	2020	2019	2018	2017
Fund (cumulative)	-9.4%	-19.2%	-9.3%	3.3%	49.3%	16.7%	4.4%	15.7%	-6.2%	11.0%
