## Overview

The Diversified Growth Fund (DGF) is a growth focussed fund where the member's assets are invested in a broad range of investments seeking to grow faster than inflation whilst at the same time managing the exposure to risk. It forms part of a member's Journey Path.

Over the quarter, the DGF delivered a return of -17.0% compared to the return objective of 5.0%. Over the 12 months a return of -8.6% was achieved compared to the return objective of 13.8%. The return over a 5-year period was 17.3% compared to the return objective of 30.8%.

In keeping with the Trustee's Responsible Investment (RI) objectives, sustainability remained core to the Fund with an RI allocation of 64%.

Journey Path: The retirement Journey Path is in three phases, from growth, to pre-retirement, to retirement. During the pre-retirement phase the majority of member pension savings are gradually moved from the DGF to the Retirement Countdown Fund (RCF), over a 15-year period. The allocation then remains constant in the retirement phase.

Full details of Journey Path and Fund Objectives are set out in the Statement of Investment Principles, [here](#).

## Description

The DGF allocates investments between five groups, consisting of different asset classes, each of which has different risk and return characteristics. The balance across the asset classes is at the Investment Manager's discretion, subject to agreed guidelines.

The Investment Manager bases its decisions on its long-term risk and return assessment of different asset classes, anticipated levels of diversification, impact of changing economic conditions and the integration of responsible investment considerations.

The integration of responsible investment considerations seeks to manage investment risk with the aim of enhancing long-term portfolio returns, which is in the best interests of the members and beneficiaries of the Fund.

## Changes over the quarter

The second quarter of 2022 has continued to be difficult for global markets. Equity and bond markets lost value due to the uncertainty relating to the war in Ukraine and aggravated inflation pressures. Inflation across many economies reached the highest level for 40 years. Central banks across developed economies have signalled their plan to raise interest rates in the future to combat inflation, with the Federal Reserve and the Bank of England raising their base interest rates by 0.75% and 0.25% respectively.

Markets still continue to price in further interest rate hikes which furthered concern about the global growth outlook and recessionary fears. Until further clarity is achieved we expect markets to continue to be volatile.

Portfolio allocations have largely been maintained throughout the quarter with rebalancing being undertaken to help manage overall risk levels. The portfolio did, however, see an increase in the allocation to the Responsible Investment assets with the level reaching 64%.
